 = PEACE  
OF MIND

## The heat reflects away, and your home stays cool.

The CertainTeed Cool Roof Shingle Collection is a brilliant breakthrough that puts cool roof technology to work for you. Plus, our palette of rich, authentic colors makes it an easy choice for eco-friendly living.

The secret is in CertainTeed's advanced roofing granules that reflect solar energy and radiant heat far better than traditional roofing shingles, reducing your roof's temperature in the summer.

CertainTeed Cool Roof Shingles are ecologically smart, beautifully durable, and architecturally ideal for sunny climates or anywhere solar heat is a challenge.

## Technology that protects the beauty of your roof and strengthens its performance.

### **NAILTrak**<sup>®</sup> Shingle Technology

#### The bond that holds it together.

For more than a decade, NailTrak has improved shingle installation by providing a nailing area three times wider than that of a typical laminate shingle. This increases efficiency and accuracy in installation, providing homeowners greater peace of mind. Landmark<sup>®</sup> Solaris shingles also feature our specially-formulated Quadra-Bond<sup>®</sup> adhesive, providing industry-leading resistance to delamination. Together, our NailTrak and Quadra-Bond technologies deliver the strength and durability that allow your roof to stand the test of time.

## LANDMARK SERIES

### SPECIFICATIONS

- Two-piece (Landmark Solaris and Landmark Pro Solaris) and three-piece (Landmark TL Solaris) laminated fiberglass-based construction
- Classic shades and dimensional appearance of natural wood or slate
- Complies with the 2019 California Title 24 Part 6 Cool Roof Requirements.
- Complies with Los Angeles County, California Title 31 Cool Roof Requirements for steep-sloped (roof slope > 2:12) residential construction

For U.S. building code compliance, see product specification sheets.

CertainTeed products are tested to ensure the highest quality and comply with the following industry standards:

#### Fire Resistance:

- UL Class A
- UL certified to meet ASTM D3018 Type 1

#### Wind Resistance:

- UL certified to meet ASTM D3018 Type 1
- ASTM D3161 Class F

#### Tear Resistance:

- UL certified to meet ASTM D3462
- CSA standard A123.5

#### Quality Standards:

- ICC-ES-ESR-1389 & ESR-3537

### WARRANTY

- Lifetime limited transferable warranty against manufacturing defects on residential applications
- 50-year limited transferable warranty against manufacturing defects on group-owned or commercial applications (Landmark PRO Solaris and Landmark TL Solaris)
- 15-year StreakFighter® algae-resistance warranty (Landmark TL Solaris - where available)
- 10-year SureStart™ protection
- 15-year 110 mph wind-resistance warranty
- Wind warranty upgrade to 130 mph available. CertainTeed starter and CertainTeed hip and ridge required

See actual warranty for specific details and limitations.

# Integrity Roof System™

A COMPLETE APPROACH TO LONG LASTING BEAUTY AND PERFORMANCE

With as much care as you take in selecting the right contractor, choosing the right roof system is equally as important. A CertainTeed Integrity Roof System combines key elements that help ensure you have a well-built roof for long-lasting performance.

## 1. Waterproofing Underlayment

The first step in your defense against the elements. Self-adhering underlayment is installed at vulnerable areas of your roof to help prevent leaks from wind-driven rain and ice dams.

## 2. Water-Resistant Underlayment

Provides a protective layer over the roof deck and acts as a secondary barrier against leaks.

## 3. Starter Shingles

Starter Shingles are the first course of shingles that are installed and designed to work in tandem with the roof shingles above for optimal shingle sealing and performance.

## 4. Shingles

Choose from a variety of Good-Better-Best styles to complement any roof design and fit your budget.

## 5. Hip & Ridge Caps

Available in numerous profiles, these accessories are used on the roof's hip and ridge lines for a distinctive finishing touch to your new roof.

## 6. Ventilation

A roof that breathes is shown to perform better and last longer. Ridge Vents, in combination with Intake Vents, allow air to flow on the underside of your roof deck, keeping the attic cooler in the summer and drier in the winter.
